PROFESSIONAL SUMMARY

Cyber Security Engineering student graduating **May 2027**, seeking full-time **cybersecurity engineering**, **SOC**, or **security analyst roles**.

EDUCATION

Iowa State University - Ames, IA **Anticipated Graduation – May 2027**
Bachelor of Science - Cyber Security Engineering
Selected Coursework: Network Protocols and Security (CPRE 4300); Cyber Security Fundamentals (CPRE 2300); Cyber Security Concepts (CPRE 2310); Linux Operating System Essentials (COM S 2520); Applied Cryptography (CPRE 3310); Operating Systems (CPRE 3080, in progress); Wireless Security (CPRE 4370, in progress)

CYBERSECURITY LAB EXPERIENCE

Security & Network Defense Coursework - Iowa State University **2025-Present**
• Configured Linux and pfSense networking/firewall environments; used Nmap to enumerate hosts/services and Wireshark to inspect traffic and protocol behavior in controlled labs.
• Used Splunk for log search and security monitoring; analyzed web-security issues and vulnerabilities involving CVEs, SQL injection/XSS concepts, DNS, SSH, and TLS.S

TECHNICAL PROJECTS

LLM Agentic System for Circuit Card Design | CPRE 4910 **Aug 2026-Present**
• Collaborate on a 5-person senior design team developing an LLM-based agentic system to automate early-stage circuit-card design workflows for an industry client.
• Define requirements and automation opportunities for a cloud-based system using Python/Linux, Docker, and Qwen 3.4 or similar models, with an embedded machine-learning hardware design as the evaluation case.

Autonomous Archaeology Survey Rover | CPRE 2880, Iowa State University **Jan 2026-May 2026**
GUI Development | ***System Design*** | ***Testing*** | ***Documentation*** | ***Python***, ***Embedded C***, *Sensors*, ***UART/WiFi***
• Improved operator visibility for a **5-person autonomous rover project** by developing **GUI components** and mapping sensor, navigation, communication, and actuator flow into system designs and sketches.
• Supported mission validation by creating test-field/system sketches, documenting **Travel and Survey modes**, and testing rover behavior against project requirements.
• Strengthened integration planning by translating requirements into phased work across **movement, sensing, scanning, hazard avoidance, communication, and destination logic**.

Dine-Der | COM S 3090, Iowa State University **Aug 2025-Dec 2025**
Android Front-End | ***UI*** | ***Testing*** | ***CI/CD*** | ***Java***, ***XML***, ***Android Studio***, ***Volley***, ***WebSockets***
• Delivered Android front-end functionality for a **4-person team** by building restaurant browsing, admin management, account/navigation, and app-review workflows in **Java and XML**.
• Enabled real-time client-server interaction by integrating **Volley HTTP requests** and **WebSocket updates** for reviews, live user counts, and session-related features.
• Contributed **117 unique commits** across archived project history by implementing UI/networking features, supporting **CI/CD** troubleshooting, testing functionality, and documenting the system.

EXPERIENCE

Iowa State University Foundation - Calling Center **May 2025-Present**
Student Supervisor
Ames, IA

- Train cohorts of **up to 40 fundraisers** by delivering onboarding, ongoing feedback, and reusable training resources that promote consistent performance.
- Improve visibility into performance for **40 fundraisers** by maintaining **Excel-based metrics**, reference materials, and training resources.
- Support technical continuity by troubleshooting routine **IT/network issues** and leading weekly **tool-development** knowledge-sharing sessions.

LEADERSHIP & INVOLVEMENT

Hacking and Cyber Security Club (HACC) - Member **Aug 2025-Present**
Central Asian Student Association (CASA) - Founding Contributor **Jan 2026-Present**
***Former Social Media Manager**, Jan 2026-Sep 2026*
Hackathon Club – Member **Jan 2026-Present**

TECHNICAL SKILLS

Cybersecurity - Linux, Nmap, Wireshark, Splunk, pfSense, web security, vulnerability analysis, security monitoring, IT/network troubleshooting
Programming and Development - Java, C, Python, HTML, XML, Bash, Verilog, LEGv8 Assembly
Networking and Systems - HTTP/REST, WebSockets, Volley, UART, ADC, sensors, embedded systems, FPGA/digital logic
Tools - Git, GitHub, Android Studio, Visual Studio Code, Cygwin, Microsoft Excel
Languages - Uzbek (Fluent), Russian (Fluent), English (Fluent), Turkish (Beginner)
